

Traveling Electrical Superintendent

Hyperscale Data Center & Mission Critical Electrical | Nationwide Travel | Available Upon Contract Completion

40+	27+	300+	\$1.3B
YEARS IN ELECTRICAL FIELD LEADERSHIP	YEARS AS SUPERINTENDENT	PEAK CREW SIZE SUPERVISED	HIGHEST PROJECT VALUE

LOCATION	Currently on assignment in the Midwest; home base in the Southeast; open to travel-based roles in the Southeast and Midwest, prefers travel over relocation
POSITION	Traveling Electrical Superintendent
YEARS OF EXPERIENCE	40+ years in electrical construction, including 27+ years as Superintendent
BACKGROUND	Progressed through respected regional and national electrical contractors; currently supporting a national general contractor on large-scale aerial and electrical operations for hyperscale data center and mission critical projects
CERTIFICATIONS	IBEW Inside Wireman; OSHA, Fall Protection, Aerial Lift, Arc Flash, and HazMat certified
SOFTWARE PROFICIENCY	Procore, Bluebeam, and Autodesk
SECTOR EXPERIENCE	Hyperscale data center, healthcare, retail, cold storage, and large commercial
START DATE	Current contract nearing completion; available upon completion

CANDIDATE OVERVIEW

This candidate is a senior electrical superintendent with over four decades in the trade, including 27+ years leading field operations on commercial, industrial, and mission critical projects. His background spans some of the most demanding environments in the industry, with hands-on leadership of data center construction for hyperscale clients alongside healthcare, retail, cold storage, and large commercial builds. He has directed crews as large as 300+ personnel and projects exceeding 800,000 square feet, giving him a level of scale experience that few candidates in this space can match.

Throughout his career, he has built a reputation as a hands-on field leader who keeps complex projects moving safely and on schedule. He has managed multiple superintendents and crews exceeding 100 electricians, working as the primary liaison between project management, general contractors, and inspectors. His progression through respected regional and national contractors reflects a consistent pattern of taking on greater scope and responsibility, culminating in his current role supporting a national general contractor on large-scale aerial and electrical operations.

As his current contract nears its conclusion, he is exploring his next opportunity and is specifically drawn to traveling superintendent roles that would bring him closer to his home base in the Southeast while allowing him to continue working on high-profile mission critical projects. He is comfortable with extensive travel and values the flexibility to return home periodically, making him well suited for a national traveling position. His combination of technical depth, crew leadership at scale, and proven adaptability across project types make him a strong fit for organizations seeking a senior leader who can mobilize quickly and deliver in demanding environments.

KEY STRENGTHS

- 27+ years as a Superintendent with 40+ years overall in electrical construction
- Extensive hyperscale data center experience with major technology clients
- Managed crews up to 300+ personnel and projects over 800,000 sq ft
- \$1.3B in highest project experience
- Comfortable mobilizing nationally for traveling assignments
- Proven track record across healthcare, retail, cold storage, and commercial sectors

SKILLS CHECK LIST

- 40+ years commercial/industrial electrical experience across a broad career history
- 27+ years in superintendent roles across multiple employers
- NEC, OSHA, and industry standards knowledge; OSHA, Arc Flash, and HazMat certified
- Reading blueprints, one-lines, and construction documents across mission critical and commercial builds
- Managing large crews and coordinating multiple trades: led teams up to 300+ personnel and multiple superintendents
- Field technology platforms: proficient in Procore, Bluebeam, and Autodesk
- Valid driver's license and ability to travel nationwide, with Southeast preference
