RELOCATION	Open
START DATE	2 weeks from offer

CANDIDATE OVERVIEW

This candidate is a senior Construction and Quality Management professional with 20+ years of experience leading complex federal, DoD, nuclear, industrial, infrastructure, and mission-critical construction projects throughout the United States and internationally. His background includes projects ranging from multimillion-dollar facilities to multibillion-dollar nuclear programs, with extensive experience in construction management, QA/QC, project management, site supervision, and federal construction compliance. He has managed projects through planning, budgeting, scheduling, execution, inspection, commissioning, and closeout while maintaining strict adherence to safety, quality, regulatory, cost, and schedule requirements.

He brings particularly strong experience within highly regulated federal and nuclear environments, including work supporting the Department of Defense, Department of Energy, NAVFAC, USACE, FEMA, Department of State, and other government organizations. His technical background encompasses civil, structural, mechanical, electrical, HVAC, plumbing, utilities, wastewater, nuclear facilities, data centers, SCIF environments, and major infrastructure projects. He is highly experienced with the Three Phases of Construction Quality Control, subcontractor management, constructability reviews, work packages, inspections, RFIs, submittals, corrective actions, nonconformance management, testing, documentation, and government/client coordination.

His project history includes a \$7B+ nuclear reactor construction program at Plant Vogtle, a \$6B+ nuclear enrichment facility, \$1B+ nuclear power station upgrades, and numerous federal and DoD assignments throughout his career. He currently serves in a combined Construction Manager, Quality Control Manager, Site Superintendent, and SSOH capacity on a federal project at Shaw Air Force Base. He brings an extensive portfolio of federal quality and safety credentials, including USACE/NAVFAC CQM, OSHA 30, NQA-1 and nuclear QA/QC training, along with experience operating in high-security environments requiring strict documentation, quality, safety, and regulatory compliance.

KEY STRENGTHS

- 20+ years of construction management and QA/QC experience
- • Extensive Federal, DoD, DOE and nuclear construction background
- • Managed and supported projects ranging into the multibillion-dollar range
- • Strong USACE/NAVFAC Three-Phase Quality Control experience
- • Extensive civil, structural, mechanical, electrical, HVAC, plumbing and infrastructure knowledge
- • Proven Construction Manager, QCM, Superintendent and SSOH experience
- • Strong subcontractor, inspector, government and stakeholder management
- • Extensive experience in highly regulated and high-security construction environments
- • Deep knowledge of NQA-1, federal quality requirements, inspections and regulatory compliance
- • Experienced with project controls, scheduling, budgeting, EVMS, work packages and corrective action planning

SKILLS CHECK LIST

- • Construction Management
- • Quality Control Management
- • Federal / DoD Construction
- • Nuclear Construction & QA/QC
- • USACE / NAVFAC CQM
- • Three-Phase Quality Control
- • Site Superintendent Leadership
- • SSOH / Construction Safety
- • QA/QC Audits & Inspections
- • NQA-1 Compliance
- • Subcontractor Management
- • Constructability Reviews
- • RFIs & Submittals
- • Work Package Management
- • Nonconformance / Corrective Actions
- • Project Controls / EVMS
- • Cost & Schedule Management
- • Civil / Structural Inspection
- • Mechanical / Electrical / MEP Oversight
- • Commissioning & Facility Turnover
- • BIM 360 / Bluebeam / Procore
- • Primavera / MS Project
