CANDIDATE OVERVIEW

This candidate is an accomplished Safety Professional with 15+ years of construction experience, including 7+ years specializing in construction safety management across large-scale mission-critical, industrial, healthcare, refinery, and manufacturing projects. He brings direct safety leadership experience on major data centers, battery manufacturing facilities, healthcare construction, and industrial environments with individual project values reaching \$5.8 billion. His background combines extensive field safety expertise with hands-on construction experience, giving him a practical understanding of the hazards, challenges, and production demands associated with active construction environments.

He has served in Site Safety Manager, Safety Manager, Site Safety Coordinator, HSE Technician, and Safety Auditor positions, with responsibilities including daily site inspections, safety audits, hazard assessments, employee orientations, toolbox talks, pre-task planning, incident and near-miss investigations, root cause analysis, corrective actions, safety documentation, and field coaching. His recent experience includes safety oversight on Google, Amazon, Facebook, and major manufacturing/data center projects, where he has worked directly with field crews, foremen, subcontractors, and general contractors to maintain safety compliance while supporting project productivity.

In addition to his safety management background, he brings several years of hands-on ironworking, structural steel, welding, fabrication, crane, and rigging experience, providing him with strong credibility when working directly with craft professionals in the field. He holds an extensive portfolio of safety credentials including SMP, CHST, STSC, COSS, NCCER CSST/CSSS, OSHA 30, EM 385-1-1, NFPA 70E, HAZWOPER 40, and CPR/First Aid/AED. His combination of professional safety certifications, major-project experience, and hands-on construction knowledge makes him particularly well suited for Safety Manager and Site Safety leadership positions in mission-critical and complex construction environments.

KEY STRENGTHS

- 15+ years of construction experience with 7+ years specializing in safety management
- Extensive safety leadership experience on large-scale data center and mission-critical projects
- Safety experience on projects ranging from \$300M to \$5.8B
- Direct experience supporting Google, Amazon and Facebook data center construction
- Strong incident investigation, root cause analysis and corrective action experience
- Extensive jobsite auditing, hazard identification and regulatory compliance background
- Hands-on ironworking, structural steel, welding, crane and rigging experience
- Strong field coaching and mentoring experience with craft professionals and foremen
