

Project Manager / QA/QC Manager

Industrial / Mission-Critical Construction

7+

YEARS OF EXPERIENCE

\$100 Million+

LARGEST PROJECT

LOCATION	Odessa, TX
POSITION	QA/QC Manager
YEARS OF EXPERIENCE	7+
CERTIFICATIONS	OSHA 10, TWIC, PLC Programming Certificate
SALARY REQUIREMENT	\$120k+
RELOCATION	Open / Willing to Relocate Anywhere
START DATE	2 weeks from offer

CANDIDATE OVERVIEW

This candidate is a Project Manager and QA/QC professional with 7+ years of progressive experience across mission-critical data centers, oil and gas, fabrication, and industrial construction. His background combines hands-on field construction experience with extensive quality control, inspection, project coordination, and subcontractor management. He currently serves as a Project Manager / QA/QC Manager on a large-scale mission-critical data center project, managing three subcontractors responsible for structured data cabling, OSP fiber infrastructure, and electronic security systems.

Throughout his career, he has developed multidisciplinary construction experience covering civil, mechanical, structural, electrical, instrumentation, piping, low-voltage, and controls-related scopes. His QA/QC background includes field inspections, weld mapping, material traceability, MTR/COC review, NDE coordination, RFIs, submittals, redlines, testing, system walkdowns, punch lists, turnover documentation, and project closeout. He has worked closely with construction supervision, craft personnel, engineers, client inspectors, vendors, and project stakeholders to resolve deficiencies and maintain compliance with project drawings, specifications, and quality requirements.

He brings a strong combination of field-level construction knowledge and project/quality management experience, with proven ability to coordinate manpower, work sequencing, material readiness, inspections, testing activities, production, and schedule priorities. His progression from hands-on industrial construction into QA/QC inspection and project management provides him with a practical understanding of both field execution and quality requirements. He is open to relocation and is particularly well-positioned for QA/QC, project management, industrial, and mission-critical construction opportunities.

KEY STRENGTHS

- 7+ years of construction experience across mission-critical data centers, oil & gas, fabrication, and industrial construction
- Current Project Manager / QA/QC Manager overseeing three subcontractors on a large-scale mission-critical data center project
- Extensive QA/QC experience including field inspections, quality audits, corrective actions, documentation, testing, punch lists, and turnover
- Strong material traceability background including MTRs, COCs, weld maps, heat-number tracking, and NDE documentation
- Multidisciplinary construction experience across civil, mechanical, structural, electrical, piping, instrumentation, low-voltage, and controls
- Proven subcontractor, field, client, and stakeholder coordination experience
- Experience coordinating manpower, production, scheduling, material readiness, inspections, testing, and project milestones
- Hands-on industrial construction background with career progression from skilled labor into QA/QC and project management

SKILLS CHECK LIST

- Project Management & Field Coordination
- QA/QC Management & Field Inspection
- Mission-Critical / Data Center Construction
- Subcontractor Management
- Material Traceability / MTR / COC Review
- Weld Mapping & NDE Coordination
- RFIs, Submittals, Redlines & As-Builts
- Production & Schedule Tracking
- Testing, Punch Lists & Turnover
- Civil, Mechanical, Structural & Electrical Inspection
- Data Cabling / OSP Fiber / Security Systems
- Blueprint & Construction Drawing Review
- Bluebeam Revu, Procore, SharePoint & Excel
