AVAILABILITY	ASAP

CANDIDATE OVERVIEW

CND320792 is a General Superintendent with 28+ years of construction management experience across mission critical, healthcare, and large-scale commercial construction. He most recently served as General Superintendent for BE&K Building Group on a Nova Pharmaceuticals manufacturing facility in Clayton, North Carolina, a \$4.4 billion life sciences project. He is currently based in Michigan and available for a new assignment.

His background includes mission critical and data center construction, healthcare facility construction, hospitality, and industrial development, with individual project values ranging from \$1 million to \$4.4 billion. As Senior Superintendent for Black & Veatch, he oversaw Cox Communication data center construction across Florida and Louisiana, a \$600 million portfolio. His healthcare project history includes the Carolinas Medical Center bed tower, the Duke Children's Cancer Care Unit, and Providence Northeast Hospital renovations, completed while with KBR.

He has led MEP coordination, commissioning, startup, and turnover on complex mission critical facilities, working directly with owners, engineers, and trade partners through project closeout. He holds OSHA 10 and 30 certifications and NCCER Field Safety Training, with ASHE Healthcare Certification in progress. He is open to nationwide travel and available for interviews immediately.

KEY STRENGTHS

- Field-first leader who prefers running crews to a desk; has directed crews up to 85 plus subcontractors and other superintendents
- "Keeps the track laid in front of the train" — long-lead procurement and look-ahead scheduling to catch issues months out
- Deep MEP background (HVAC, electrical, boiler, chiller, plumbing) — strong fit for mechanical-scope contractors
- Ground-up data center experience on a large Southwestern development; comfortable in mission-critical environments
- Proven schedule recovery: brought a stalled DoD dining facility in on time and a \$7.5M lighting retrofit back on schedule
- Commissioning, QA/QC, and turnover experience across federal energy and mission-critical projects
- U.S. military veteran (5 deployments); disciplined, mobile, and available within 48 hours

SKILLS & CREDENTIALS CHECK LIST

- 28+ years of construction management experience, including 15+ years at the Superintendent and Director level
- Most recently led field operations as General Superintendent on a \$4.4 billion life sciences manufacturing project
- Data center construction experience, including a \$600 million Cox Communication portfolio across Florida and Louisiana
- Managed project teams exceeding 100 personnel on assignments up to \$4.4 billion
- Strong commissioning, startup, and turnover background on mission critical facilities
- Immediately available with no current employer conflict
- Open to nationwide travel
