CANDIDATE OVERVIEW

This candidate is an EPA Universal and NATE Certified HVAC Service Technician with 5 years of hands-on HVAC experience across residential and commercial environments, including approximately 3 years of commercial service exposure. His background includes troubleshooting, diagnostics, preventive maintenance, equipment repair, refrigeration, electrical troubleshooting, airflow, thermostats, furnaces, condensers, ductwork, and complete HVAC system installations. He is comfortable working independently in the field, communicating directly with customers and contractors, and identifying practical repair solutions while maintaining safe and professional workmanship.

He currently performs HVAC service and maintenance supporting commercial and modular facilities throughout the Tucson area. His responsibilities include diagnosing mechanical, electrical, airflow, and refrigeration-related issues, inspecting system performance, identifying failed components, completing preventive maintenance, and performing component replacements to minimize equipment downtime. His commercial experience has included traveling between active facilities and construction sites to service and maintain HVAC equipment supporting office and modular building environments.

From a diagnostic standpoint, he follows a systematic troubleshooting process beginning with incoming power and low-voltage controls before working through individual system components. He is experienced diagnosing capacitors, contactors, control boards, compressors, fan motors, blower motors, thermostat wiring, refrigeration systems, and related HVAC components. He brings a combination of service, installation, electrical troubleshooting, and customer-facing experience and is actively looking to continue developing his career on the commercial HVAC service side.

KEY STRENGTHS

- 5 years of hands-on HVAC installation, service, maintenance, and troubleshooting experience
- Approximately 3 years of commercial HVAC service exposure
- EPA Universal and NATE Certified
- Current experience servicing commercial and modular facilities throughout Tucson
- Strong systematic HVAC diagnostic and troubleshooting approach
- Experience diagnosing electrical, refrigeration, airflow, and mechanical system issues
- Comfortable independently performing service calls and determining appropriate repairs
- Strong customer and contractor communication background
