POSITION	Electrical Superintendent
YEARS OF EXPERIENCE	25+
CERTIFICATIONS	OSHA 30, Texas Electrical Journeyman License
SALARY REQUIREMENT	\$150k+
RELOCATION	No but willing to travel
START DATE	2 weeks from offer

CANDIDATE OVERVIEW

An accomplished Electrical Superintendent with decades of progressive experience leading large-scale commercial, industrial, government, and mission-critical electrical construction projects throughout the Southeast and across multiple regions of the United States. This candidate has successfully delivered complex electrical scopes on high-profile projects including major airports, K-12 and higher education facilities, military installations, secure government command centers, wind farms, and data center environments. He has consistently demonstrated the ability to manage fast-paced, high-pressure construction schedules while maintaining strict adherence to safety standards, quality control requirements, and project budgets.

Throughout his career, he has overseen all phases of electrical construction from preconstruction planning and manpower loading through final commissioning and project closeout. He is highly experienced in coordinating large field teams, managing multiple subcontractors, and working directly with general contractors, owners, engineers, and inspectors to ensure successful project execution. His leadership style is hands-on and production-driven, with a strong emphasis on accountability, communication, and field efficiency.

In addition to his technical expertise, he brings extensive experience managing multimillion-dollar electrical contracts and large-scale manpower operations, often supervising crews ranging from dozens to well over one hundred electricians across multiple job sites simultaneously. He is well-versed in interpreting construction documents, resolving field conflicts, and maintaining project momentum in challenging environments.

He is also highly adaptable and travel-ready, with a proven history of supporting projects across multiple states and regions. His background in both commercial and mission-critical electrical construction positions him well for complex, schedule-driven environments such as data centers and large infrastructure projects. He is seeking a long-term opportunity where he can continue to leverage his leadership experience on large-scale traveling superintendent assignments.

KEY STRENGTHS

- 35+ Years Electrical Construction
- Large Crew Leadership
- Mission Critical
- Experience
- Safety-Focused Leader
- Procore & PlanGrid
- Proficient
- Commercial & Industrial Expertise
- Electrical Superintendent
- Data Center Experience
- Commercial & Industrial
- Large Crew Management
- OSHA & NEC Knowledge
- Nationwide Travel Read

SKILLS CHECK LIST

- Blueprint & One-Line Interpretation
- QA/QC Management
- Project Scheduling
- Multi-Trade Coordination
- Medium Voltage Systems
- Generator & UPS Systems
- Large Crew Leadership
- Safety-Focused Leade
