SALARY REQUIREMENT	\$125k+
RELOCATION	Open to Extensive Travel and Relocation
START DATE	2 weeks from offer

CANDIDATE OVERVIEW

This candidate is a seasoned construction Superintendent with 24+ years of industrial and heavy construction experience, including more than a decade in Civil Superintendent, General Foreman, and senior field leadership positions. He currently serves as a Civil Superintendent with McDermott on the \$20B+ Golden Pass LNG project, where he oversees civil operations across multiple LNG trains. His responsibilities extend beyond concrete and civil work to include manpower planning, scheduling, cost and performance tracking, material procurement, vendor coordination, safety, field productivity, and multi-craft coordination to successfully execute and turn over work to operations.

His career includes extensive experience across LNG facilities, power plants, nuclear facilities, chemical plants, industrial manufacturing, underground utilities, and major heavy civil projects. His core technical background includes concrete, rebar, grouting, underground/site work, scaffolding, welding, excavation, equipment operations, and structural/civil construction. He has supervised diverse craft workforces consisting of carpenters, rebar crews, concrete workers, scaffolders, equipment operators, and other trades while maintaining responsibility for project schedules, materials, cost performance, productivity, safety, and environmental compliance.

Although his strongest technical background is civil construction, he has spent his career working in multi-craft industrial environments and coordinating with piping, electrical, welding, scaffolding, and other disciplines required to execute complex projects. His project history includes Golden Pass LNG, Cameron LNG, multiple Duke Energy and other major power plants, nuclear construction, chemical facilities, and industrial plants throughout the country. He is based in Columbus, Mississippi, has traveled throughout his career, and is comfortable continuing to support projects throughout Mississippi and the Southeast.

KEY STRENGTHS

- 24+ years of industrial and heavy construction experience
- 14+ years in Civil Superintendent, Senior General Foreman, and field leadership roles
- Current Civil Superintendent on the \$20B+ Golden Pass LNG project
- Extensive LNG, power generation, nuclear, chemical plant, and industrial construction experience
- Strong multi-craft leadership across civil, concrete, rebar, scaffolding, welding, underground, piping, and equipment operations
- Hands-on responsibility for scheduling, manpower, productivity, cost control, materials, and vendor coordination
- Extensive concrete, grouting, underground utility, excavation, and site-work expertise
- Mississippi-based and accustomed to extensive project travel

SKILLS CHECK LIST

- Superintendent / Field Leadership
- Industrial Construction
- LNG Construction
- Power Generation
- Heavy Civil Construction
- Multi-Craft Coordination
- Concrete & Rebar
- Epoxy / Cementitious Grouting
- Underground Utilities
- Excavation / Trenching
- Site Work
- Scaffolding
- Welding / Fabrication
- Piping Coordination
- Manpower Planning
- Project Scheduling
- Cost / Budget Management
- Productivity / Performance Tracking
- Material Procurement
- Vendor Coordination
- Safety & Environmental Compliance
- Project Turnover
- Craft Workforce Management
