LOCATION	Open to nationwide travel; home base flexible
POSITION	Traveling Mechanical Superintendent (Data Centers)
YEARS OF EXPERIENCE	~34 years mechanical construction; 4-5 years data center delivery
BACKGROUND	Owner's-rep and MEP/mechanical superintendent across data center, industrial, and manufacturing; welder by trade
CERTIFICATIONS	OSHA 30, OSHA 10, TWIC Card; AGC Construction Supervision & Lean Construction
SOFTWARE	Procore, Bluebeam Revu, AutoCAD, Excel
COMPENSATION	Target \$70–\$75/hr; open to discussion
AVAILABILITY	Available now; travel-ready; prefers long-term opportunities

CANDIDATE OVERVIEW

This candidate is an owner-side mechanical construction leader with roughly 34 years of mechanical experience and four to five years in data center delivery. He recently completed a one-year owner's representative contract on a 1.1 GW greenfield data center campus in the Midwest, a seven-facility development, serving as Mechanical TFO Lead over a five-person team and acting as primary field contact across ownership, general contractors, designers, mechanical contractors, and commissioning teams.

His mechanical command spans piping, chillers and CDU systems, chilled and condensate water, process water, plumbing, and full MEP coordination. He has managed mechanical RFIs, change orders, T&M tickets, submittals, pay-application review, field inspections, and startup and turnover. Prior data center work includes a multi-year greenfield build in the Southeast as MEP Superintendent, overseeing HVAC, plumbing, chilled water, and process piping subcontractors while holding the schedule.

His broader background covers industrial, pharmaceutical, healthcare, refinery, and pipeline environments, including mechanical and piping superintendent roles at refineries and chemical plants. Originally trained as a welder, he brings hands-on technical knowledge to subcontractor and craft management. He is highly mobile, travels project-to-project, and prefers long-term assignments where he can stay and grow.

KEY STRENGTHS

- Owner's-rep and MEP superintendent on greenfield data center campuses
- ~34 years mechanical construction; 4-5 years data center delivery
- Mechanical TFO Lead on a 1.1 GW, seven-facility greenfield campus
- Full mechanical scope: piping, chillers, CDU, chilled and process water, plumbing
- Manages RFIs, change orders, T&M, submittals, inspections, and turnover
- Welder by trade with hands-on subcontractor and craft leadership
- Highly mobile career traveler who prefers long-term opportunities

SKILLS CHECK LIST

- OSHA 30, OSHA 10, TWIC Card
- AGC Construction Supervision Fundamentals; AGC Lean Construction
- Mechanical: piping, chillers, CDU, chilled/condensate/process water, plumbing
- MEP coordination and subcontractor oversight
- RFIs, change orders, T&M management, submittals, pay-app review
- Field inspections, commissioning coordination, startup and turnover
- Schedule, cost, quality, and safety management
- Procore, Bluebeam Revu, AutoCAD, Excel
