CANDIDATE OVERVIEW

This candidate is an El Paso-based construction and quality professional with 20+ years of experience spanning QA/QC, construction management, project controls, contract administration, field inspection, utilities, and project delivery. Although the formal Quality Control Manager titles are more recent, previous Construction Manager/RPR and Project Manager positions included substantial responsibility for quality, plans/specifications, inspections, submittals, RFIs, shop drawings, safety, project controls, and closeout. tr_Maria_Mata_Resume The candidate is currently working as a Quality Control Manager on a data center project, helping establish and manage the quality program while coordinating preparatory activities, inspections, documentation, field walkthroughs, testing, and turnover. Project experience also includes federal/USACE, healthcare, commercial, higher education, power, and utility construction.

KEY STRENGTHS

- 20+ years of construction and quality experience
- Current QC Manager with direct data center experience
- Quality program development and administration
- Three-Phase Control and ITP experience
- Strong inspection, testing, and documentation background
- Federal/USACE project experience
- Previous Construction Manager and Project Manager experience
- Strong field/team communication and coordination
