CANDIDATE OVERVIEW

CANDIDATE OVERVIEW This candidate brings over 20 years of construction experience working as a Quality Control Manager, Superintendent, General Superintendent, and Project Manager on commercial, federal, industrial, and infrastructure projects. He is local to El Paso and has extensive experience managing quality programs, coordinating subcontractors, overseeing field operations, and working directly with owners and government representatives. His background includes military installations, healthcare facilities, electrical infrastructure, and large commercial developments. He is currently working in a QC/Superintendent capacity on electrical distribution upgrades, switchgear, and infrastructure improvements. Previously, he managed major projects, including a $235M airport reconstruction project overseas, a $104M commercial tilt-up development, and multimillion-dollar electrical infrastructure improvements. He also owned and operated a construction company, completing commercial tenant improvements, service contracts, and projects for major national clients. After speaking with him, I believe he has the technical background and field experience to be worth a conversation for the QC Manager position. He has extensive experience with USACE quality requirements, specifications, inspections, third-party testing, scheduling, documentation, and holding subcontractors accountable. He is very hands-on and made it clear that he believes in identifying problems early rather than allowing issues to carry through a project. He also emphasized teamwork, communication, and having the support of project leadership.

KEY STRENGTHS

- • 20+ years of construction leadership experience across QC, superintendent, and project management positions
- • Extensive USACE and federal construction quality control experience, including approximately 10 years associated with Corps of Engineers QC work
- • Managed major projects ranging from commercial improvements to $100M+ developments and a $235M overseas airport reconstruction project
- • Strong background in electrical infrastructure, commercial buildings, healthcare facilities, military installations, and industrial construction
- • Experience reviewing specifications, developing schedules, overseeing inspections, and coordinating third-party testing
- • Hands-on QC approach emphasizing field inspections, documentation, subcontractor accountability, and correcting deficiencies
- • Experience coordinating multiple projects, subcontractors, project teams, and owner representatives
- • Local to El Paso, with a minimum salary expectation of $110K annually
