TRAVEL	Prefers local; comfortable with occasional overnight travel
START DATE	Available immediately

CANDIDATE OVERVIEW

This candidate is an electrical superintendent with eight years in commercial electrical construction, progressing from foreman to superintendent. In his most recent role (2020–2026) he led multi-site electrical operations for a contractor serving national big-box retail clients, carrying 30 to 35 active projects at once across the Southeast and Northeast. Projects ranged from $150K to over $10M and included store remodels, regional distribution centers, ground-up work, and hurricane and fire disaster recovery. He separated from that company in September 2026 after a restructuring shifted it toward temporary labor rather than permanent field teams.

His field background covers switchgear installation, underground electrical, ground-up construction, EV charging infrastructure, NEC compliance, lockout/tagout, and troubleshooting. He typically runs crews of 8 to 15 electricians and has directly supervised up to 45. He uses prefabricated assemblies and prefab conduit systems to drive productivity and quality, and works in Procore, Bluebeam, and Accubid. He holds OSHA 30 and has worked closely with corporate safety teams on compliance.

Before moving into electrical full time, he spent 14 years as a General Manager for a national restaurant and retail chain, running a location of roughly $5M in annual sales with full P&L responsibility and a staff of 200+. He places strong emphasis on mentoring apprentices and developing permanent electricians. He is based in New Orleans and prefers a local role with occasional travel. His long-term goal is to grow into project management.

KEY STRENGTHS

- Carried 30 to 35 concurrent electrical projects for national retail clients
- Directly supervised crews of up to 45 electricians
- Projects from $150K to $10M+, including distribution centers and disaster recovery
- Prefab-driven installation approach for productivity and quality
- Mentors apprentices and builds permanent field teams
- Seeking a local role; comfortable with the posted pay range

SKILLS CHECK LIST

- OSHA 30; NEC code compliance; lockout/tagout
- Switchgear, underground, ground-up construction, EV charging infrastructure
- Prefab conduit systems and prefabricated electrical assemblies
- Manpower planning, production scheduling, and QA/QC across multiple sites
- Procore, Bluebeam, Accubid
- 14 years of P&L and operations management prior to electrical
